REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 1-15 are allowable over the prior art of record because the prior art of record does not teach a process for treating exhaust gas utilizing a plasma field and a catalyst composition comprising $M(\text{Zr}_4(\text{PO}_4)_6)$, where M is a metal selected from the group consisting of platinum, palladium, ruthenium, rhodium, osmium, silver, iridium, and alloys and combinations comprising at least one of the foregoing metals.

Claims 16-24 are allowable over the prior art of record because the prior art of record does not teach a gas treatment system comprising a non-thermal plasma reactor; and a catalyst composition disposed within the non-thermal plasma reactor, the catalyst composition comprising a $M(\text{Zr}_4(\text{PO}_4)_6)$, where M is a metal selected from the group consisting of platinum, palladium, ruthenium, rhodium, osmium, silver, iridium, and alloys and combinations comprising at least one of the foregoing metals.

The closest prior art to Naohiro et al. suggests a catalyst composition that includes zirconium phosphate and a noble metal. However Naohiro et al. contemplate that the noble metal in the catalyst be in noncompounded metallic form. Applicant's claims require a compounded catalyst. Furthermore Naohiro et al. do not suggest utilizing plasma field treatment with the catalyst composition.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
